Django Website (Full-stack)

Jul 2024 – Sep 2024

- Managed PostgreSQL database using persistent Docker volumes for data storage, ensuring reliable access and secure retention of data.
- Implemented caching of MP3 files to optimize performance and reduce the usage of server bandwidth, enhancing the overall efficiency of the website.
- Integrated JavaScript frameworks such as WebMIDI.js and Tone.js, demonstrating the ability to quickly learn and apply new tools to a project.

PORTFOLIO

[GitHub](#) | [Link](#)

React Website (Full-stack)

Aug 2024 – Sep 2024

- Deployed full-stack applications on an AWS EC2 Ubuntu instance, using Docker Compose and Nginx to manage services under a unified domain.
- Configured DNS settings via Cloudflare's nameservers and implemented email sending functionality using Nodemailer, ensuring reliable communication from the server to external email providers.
- Performed server updates by securely accessing the EC2 instance via SSH, utilizing Vi in the Linux CLI to edit configuration files and manage deployed applications.
